

Interior Design at Sheridan Memorial Hospital

Sheridan Memorial Hospital has a group of employees who serve on the Interior Design Committee. This group works closely with Facilities Services on design projects throughout the hospital.

The goal of the Facilities Services Department and the Interior Design Committee is to create a cohesive interior design throughout the hospital. To ensure aesthetic fluidity, and to maintain a professional atmosphere, this group has selected a number of color choices to be used on our interior painted surfaces. Only choices from this color book may be selected for painting projects.

If you have an office or an area that you would like to put in a work order to have painted, please use the Painting Project Check List Form (on the back of this sheet) prior to placing your work order. This form is also available electronically.

Forms and pallet books are available from Roxanne Araas in Administration, Ada Kirven in the Foundation, and from the Facilities Services office.

Anyone interested in participating on the Interior Design Committee should contact Rob Forster or Annette Kassen in Facilities.

Painting Project Check List

The Goal of the Facilities Services Department and the Interior Design Committee is to create a cohesive interior design throughout the Hospital. To ensure esthetic fluidity of the interior surfaces, we have selected a number of color choices that can be used for our spaces. Please use this form to ensure that you are following the interior design strategic plan.
