QUALITY COMMITTEE REPORT

The Quality Committee did not meet, so there is no report at this time.

Dr. Addlesperger presented information on the operational goal around the Quality Pillar, which is one the Hospital’s Pillars of Excellence. The goal of the pillar is to achieve high reliability in our processes by using data to drive continuous improvements for the betterment of the organization. A specific tool that is used is the Hospital Engagement Network (HEN), which consists of a multitude of hospitals sharing data to reach common goals. Processes are built around the information collected, to improve and standardize protocols to improve outcomes with patient care; this also impacts on how the hospital is paid (merit based incentive payments). There is a Cerner quality package being implemented, which will go live the end of August. This will have the core measures on screen while the patient is here, to ensure that the patient is getting what they need.
