Why Do People Want to Get Rid of Norton?

Users might want to uninstall Norton for various reasons, such as:

- Switching to a different antivirus software

- Experiencing software conflicts or performance issues

- Subscription expiration or switching service plans

- Wanting a clean reinstall for troubleshooting

No matter your reason, it's important to **completely remove Norton** to avoid leftover files and potential system issues.

Step-by-Step Guide: How to Totally Get Rid of Norton

Step 1: Use the Norton Remove and Reinstall Tool

Norton provides a dedicated utility called the **Norton Remove and Reinstall Tool** to safely uninstall all Norton products.

- Download the tool from the official Norton website.

- Run the tool and follow the on-screen instructions to remove Norton completely.

- Restart your device when prompted.

Step 2: Uninstall Norton via Control Panel or Settings

If you prefer manual uninstallation:

- **Windows:**

  - Go to **Control Panel > Programs > Programs and Features**.

  - Find Norton in the list, select it, and click **Uninstall**.

  - Follow the prompts to complete the process.

- **Mac:**

  - Open the **Applications** folder.

  - Locate the Norton app and drag it to the Trash.

     ○   Empty the Trash to complete removal.

Step 3: Remove Leftover Files and Registry Entries (Advanced Users)

Sometimes, manual cleanup of leftover files or registry entries is necessary.

- Use tools like **CCleaner** or Norton's own removal tool.

- Be cautious editing the registry — incorrect changes can cause system issues.

Step 4: Restart Your Device

After uninstalling, restart your computer to apply changes fully.
