OVER 500,000 ADVERSE DRUG REACTIONS ANNUALLY

Each year, an estimated 500,000+ ADRs occur in long-term care facilities (LTCs), impacting patient safety and well-being.

30-50% OF INFECTIONS

Urinary track infections (UTI's) are the most common infections affecting long term care facilities causing 30-50% of all infections.

7X HIGHER RISK OF SEPSIS

Long-term care facility patients are 7 times more likely to develop severe sepsis. The CDC estimated that over 2 million sepsis related cases occur in LTC facilities each year with a high risk of morbidity.
